

# NOTIFICATION

## CALAVERAS COUNTY WATER DISTRICT

### VALLECITO / DOUGLAS FLAT WASTEWATER SERVICE AREA

The Board of Directors of the Calaveras County Water District at its regular scheduled meeting on September 14, 2005, adopted Resolution No. 2005-66 declaring that CCWD will provide sewer service to **only** those who apply for a building permit by October 31, 2005, and can present an approved building permit by February 28, 2006. After February 28, 2006, no sewer connections will be available until such time as the Board determines that there is excess capacity.

The capacity of the treatment facilities is currently limited due to regulations requiring additional reservoir storage to be available during high rain seasons. The District is proceeding with plans to construct additional storage. Construction is anticipated to begin in the Spring 2006 and be completed by Fall 2006.

Questions and additional information can be directed to the Calaveras County Water District's Engineering Department at 754-3543, Extension 18.
