Boil Water Notice

Este informe contiene información muy importante sobre su agua potable.
Tradúzcalo o hable con alguien que lo entienda bien.

BOIL YOUR WATER BEFORE USING

Failure to follow this advisory could result in stomach or intestinal illness.

A Contractor installing a power pole damaged a CCWD water main, and as a safety precaution, the State Water Resources Control Board, Division of Drinking Water, in conjunction with the Calaveras County Environmental Health Department, and Calaveras County Water District (CCWD) are advising Residents In the Wilseyville Camp and on streets and roads including Blagen Blvd, Railroad Flat Rd, Tree Ln, Hewett Ln, Daviman Rd, and Blizzard Mine Rd.

DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a boil, **let it boil for one (1) minute,** and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking and food preparation **until further notice**. Boiling kills bacteria and other organisms in the water and it is the preferred method to assure that the water is safe to drink.

- An alternative method of disinfection for residents who are unable to boil their water is to use fresh, unscented, liquid household bleach. To do so, add 8 drops (or 1/8 teaspoon) of bleach per gallon of clear water or 16 drops (or 1/4 teaspoon) per gallon of cloudy water, mix thoroughly, and allow it to stand for 30 minutes before using. A chlorine-like taste and odor will result from this disinfection procedure and is an indication that adequate disinfection has taken place.
- Water disinfection tablets may also be used by following the manufacturer's instructions.

CCWD will inform you when tests show the water is safe to drink, and you no longer need to boil your water. We apologize for the inconvenience and hope to resolve this issue within the next two-to-three days.
